

I have been notified by the office of the Attorney General for the State of Indiana that the FCC is proposing making a national "No Call" resolution for the entire nation. I'm sure that everyone will be happy to have something in place of this nature. However, we are very grateful to the one that Indiana already has in place and would not want a lesser plan to usurp it. I retired at 63 because of poor health. These calls were not only annoying for me but hard on my health problems as well. PLEASE do not do anything to set us back in the old pattern. Thank You!
